-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 1724

Applicant's election of the following species is acknowledged: traveling electric field as the electrical energy species; metal as the electrode species; X-type zeolite as the adsorbent species; smectite clay as the binder species; oxygen as the adsorbed substance species; and now exothermic as the thermal reaction species. Claims 47-55, 57 and 59-64 are deemed to read on all of these elected species. Claims 1-46 are withdrawn from further consideration, as being directed to a non-elected invention; and claims 56 and 58 are withdrawn from further consideration, as being directed to non-elected species.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 47-55, 57 and 59-64 are rejected under 35 U.S.C. 102(e) as being anticipated by Jaffe et al. (U.S. Patent No. 7,077,891; hereinafter "Jaffe"). The reference discloses a process for separating materials of the type recited (see col. 1, lines 32-36) with an adsorbent material subjected to a traveling electric field (see col. 18, line 42). This reference further teaches the use of additional purification materials of the type recited (see col. 18, lines 54 and 56), and this is all that is required by claims 47-55, 57 and 59-64.

Art Unit: 1724

Wallace (U.S. Patent No. 3,727,375), Makrides et al. (U.S. Patent No. 3,730,885) and Gold et al. (U.S. Patent No. 5,505,825) disclose similar separation processes involving subjecting an adsorbent material to an electric field.

The Roth publication cited in the IDS filed August 11, 2004 (i.e. page 1, item 9) has not been considered because Applicant has failed to provide a copy of this document, as required by 37 CFR § 1.98 and M.P.E.P. § 609.
